REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Claim 7 is allowed over the prior art of record because none of the prior art discloses or suggests an LCD panel comprising a main body (one substrate of the LCD panel), and a sliding adjustment disposed *on* the main body and having a guiding groove and a sliding piece therein, the sliding being *horizontally* shifted (as compared with the *vertically* shifted disclosed in the JP 09-034381 or that disclosed in the instant Fig. 3A) in the guiding groove along a path on a *surface of the LCD panel* (as compared with the surface of the front cover 3 or the surface of the fixing frame 2 of the JP 09-034381) to *change a resistance acting on the main body*. It is noted that the JP 09-034381 is silent about the feature "to *change a resistance acting on the main body*" and discloses that the variable resistor is for adjusting the *brightness* of the LCD panel. As is common in the LC art, the LCD *panel* comprises two substrates; and the front cover and the fixing frame are *not* elements of the LCD panel. Claims 1 and 8 are also allowed for the same reasons as those applied to claim 7.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
